

Interpretive Guide Overview

Add-On – Attach to a Coded Protocol

What Is the Interpretive Guide?

The **Interpretive Guide** is an optional **R-PAS e-Product Add-On** that automatically generates detailed, standardized interpretations based on your coded Rorschach protocol. You can buy allocations on the R-PAS products page. For each variable on the Profile Pages, the Interpretive Guide presents:

1. General Interpretations
2. Case Specific Inferences

Adapts across children, adolescents, and adults, and lets you download and edit the text for your report. It saves time and ensures consistency. Perfect for:

- **Professionals** who want efficiency without sacrificing depth
- **Students and new users** learning to structure interpretations

Key Features

1) General Interpretations

Explains **what each variable measures in general** and the **response-process foundation** for interpretation, following the sequence used on the Profile Pages.

Example: Complexity measures the richness and integration of processing during the Rorschach task...

2) Case-Specific Inferences

Provides **tailored statements** based on the respondent's **raw score** and **Standard Score (SS)**, keyed to the **interpretive range** (e.g., Low, Below Average, Average, Above Average, High).

Example: This person's Complexity score was above average, suggesting sophisticated processing and flexibility in coping...

3) Works Across Ages

Automatically interpret **children (single-year norms from 6 to 17)** and **adults (18+)**. Interpretive **bins** and ranges are age-sensitive.

4) Download & Edit

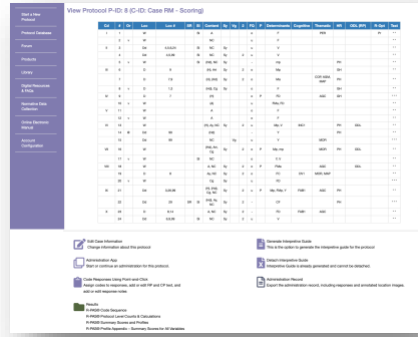

Export the complete text as **Rich Text (RTF)** for Word (best formatting) or as a **PDF**. Includes **Print** options from the output page.

Why Use the Interpretive Guide?

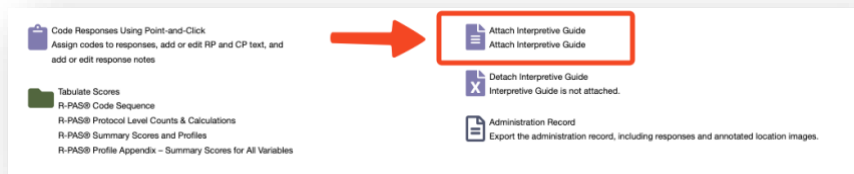

- **Save Time:** Automated interpretations replace the time of manually writing interpretations
- **Consistency & Validity:** Standardized statements align with the R-PAS norms and the latest evidence for each variable.
- **Adaptability:** Suitable for any respondent age from 6 and above

How It Works

1) **Code Your Protocol:** Complete coding in the R-PAS coding interface.

2) **Attach the Interpretive Guide:** Click “Attach Interpretive Guide” (uses one allocation).

3) **Generate the Report:** Open the protocol, click “Generate Interpretive Guide”

4) **Download & Customize:** Interpret and export to Word or PDF, then integrate into your final assessment.
